

## Rogers Corporation Offers Custom Width Slitting for PORON® Urethanes

Rogers Corporation is pleased to announce the addition of custom width slitting services. Now partners can receive their PORON® Materials already slit!

Custom width slitting is available for most products for an additional cost of \$150 per roll, regardless of the number of cuts. Minimum order quantity requires the purchase of an entire standard roll for slitting; applicable product minimum order quantities also apply.

Standard slitting specifications require a minimum slit width of one inch (25.4mm), with the slit tolerance of  $\pm 1/8^{\text{th}}$  of an inch (3.175mm). Only machine direction slitting is available.

Custom Width Calculator:

$\frac{(\text{Standard Width of Roll}) - (5" (127\text{mm}))^*}{(\text{Width of Slit})}$	$= \text{\# Custom Slit width rolls per standard roll}$
	$[\text{Round down to nearest whole number}]$

The Custom Width Calculator determines the maximum number of slit rolls that each standard roll will yield. For example, a 54" (1371.6mm) wide standard product will yield 8 finished rolls of 6" (152.4mm) width.

$\frac{54 \text{ inch} - 5 \text{ inch}}{6 \text{ inch / roll}} = 8 \text{ rolls}$
--

When placing a product order, please tell your customer service representative the rolls you would like slit, the number of cuts per roll and the width of each cut. Finished rolls, including the off cut, will be packaged together and arranged on a smaller diameter core with end caps inside a cardboard carton. Please allow an additional lead-time of up to two weeks for the custom slitting process.

Custom slitting is another example of Rogers' commitment to provide the highest quality products and services to our valued partners.

\* Five inches (127mm) must be allowed for set up adjustments
