Elastomer Components Sales & Service, One Technology Drive PO Box 188 Rogers, CT 06263-0188

Statement on RoHS Directive

Rogers Corporation, as a supplier of NITROPHYL® Floats, through its Elastomer Components Division, is committed to providing materials which are safe with respect to the environment and human health. In that regard, Rogers takes note of European Union RoHS directive (Directive 2002/95/EC), which prohibits the following substances in electrical and electronic equipment by July 2006.

- Lead
- Mercury
- Hexavalent chromium
- Polybrominated biphenyl (PBBs)
- Polybrominated diphenyl ethers (PBDEs)

Rogers is able to advise that all of our NITROPHYL® Floats are in compliance¹ with this RoHS directive. To the best of our knowledge, these Rogers products do not contain any of the RoHS listed compounds in a concentration exceeding the thresholds of 0.1% by weight in homogeneous material for lead, mercury, hexavalent chromium, PBBs, and PBDEs and of 0.01% by weight in homogenous material for cadmium.

The products covered by this statement only include the NITROPHYL® Floats and excludes any of the ENDUR® Components as they covered under separate correspondence.

Michael Sehnert
Vice President
Rogers Corporation – Asia

A handwritten signature in blue ink, appearing to read "M. Sehnert", is written over the printed name and title.
