June 20, 2011

Dear PORON® Performance Cushioning Customer,

In November 2010 the Consumer High Performance Foams Division announced the partnership and new PORON Cushioning offering with Microban® antimicrobial protection. At that time, Rogers introduced the new standard product offering of PORON® XRD™, Plus and Performance Materials with Microban® antimicrobial protection.

Over the following months, the Rogers team has continued to receive feedback from our customers in all markets about the growing need for antimicrobial products and the value added benefit of presenting PORON Cushioning with Microban® antimicrobial protection. In response, we are happy to announce that we will continue to expand PORON Cushioning with Microban® standard offering to include nearly all PORON Cushioning Materials. As stated in the 2011 Consumer PORON Price List, PORON XRD, Performance, Plus, Slow Rebound, Dual Layer and ReSource Cushioning are now standard PORON offerings with Microban® antimicrobial protection. Yes, you read correctly: there is no price increase for purchasing these, and many other PORON Materials with Microban® technology - the world's most recognized antimicrobial agent.

As Rogers continues to provide you with innovative and reliable cushioning materials, we plan to further expand the PORON Cushioning offering with Microban® technology. *For a complete and up-to-date list of all the PORON Materials which contain Microban® antimicrobial protection, please contact your Rogers Customer Service Representative.*

Furthermore, Rogers is able to exclusively offer this branded antimicrobial technology to our customers for footwear and outdoor applications. Additional product, testing and branding information can be found on the updated PORON Performance Cushioning website: www.poroncushioning.com.

Sincerely,

Rogers' PORON® Performance
Cushioning Team

The world runs better with Rogers.®
