CLASSIFICATION OF THE NE

MATERIAL:

LABELING REQUIREMENTS: NE

EFFECTS OF OVEREXPOSURE: None are expected with normal handling. Cutting and other finishing

> operations may create dust. Ventilation and personnel protection should be similar to all operations generating nuisance dust. Processing material at temperatures exceeding decomposition temperature may release toxic fumes. Dust may cause respiratory irritation. Remove to fresh air and seek medical

INHALATION:

attention if necessary. Exposure to copper fume or PTFE decomposition products may cause symptoms of metal of Polymer Fume Fever. This is characterized by flu like symptoms (fever, chills, muscle aches) that last 24

hours.

EYE CONTACT: Dust may cause irritation. Flush eyes with water and seek medical attention if

necessarv.

SKIN CONTACT: Dust may cause irritation. Wash thoroughly with soap and water.

INGESTION: None known.
