## 2. HAZARDS IDENTIFICATION

| CLASSIFICATION OF THE MATERIAL: | NE |
| LABELING REQUIREMENTS: | NE |
| EFFECTS OF OVEREXPOSURE: | None are expected with normal handling. Cutting and other finishing operations may create dust. Ventilation and personnel protection should be similar to all operations generating nuisance dust. Processing material at temperatures exceeding decomposition temperature may release toxic fumes. |
| INHALATION: | Dust may cause respiratory irritation. Remove to fresh air and seek medical attention if necessary. Exposure to copper fume or PTFE decomposition products may cause symptoms of metal of Polymer Fume Fever. This is characterized by flu like symptoms (fever, chills, muscle aches) that last 24 hours. |
| EYE CONTACT: | Dust may cause irritation. Flush eyes with water and seek medical attention if necessary. |
| SKIN CONTACT: | Dust may cause irritation. Wash thoroughly with soap and water. |
| INGESTION: | None known. |
| CHRONIC: | NE |
3. COMPOSITION/INFORMATION ON INGREDIENTS

This material is produced as an “article” as defined in 20 CFR 1910.1200 and REGULATION (EC) No 1907/2006 is therefore exempt from the Hazard Communication Standard and REACH. Since this material does not release and will not result in exposure to a hazardous chemical under normal conditions of use, no Safety Data Sheet is required.
