

BISCO® Foams & Solids Product Identification

The BISCO® product portfolio offers specifically engineered materials that maintain high performance in extreme conditions and meet stringent safety requirements. BISCO® materials are available in a wide range of silicone buns, cellular foams, sponges, solids, and specialty materials in a variety of firmness, thickness, color, and adhesive options.

Cellular Foam: Open-cell material with key properties of durability, conformability, and excellent sealing for long-term protection
Solids: Industrial and performance grade material with key properties of tight thickness tolerances, high tear strength, and superior FST performance

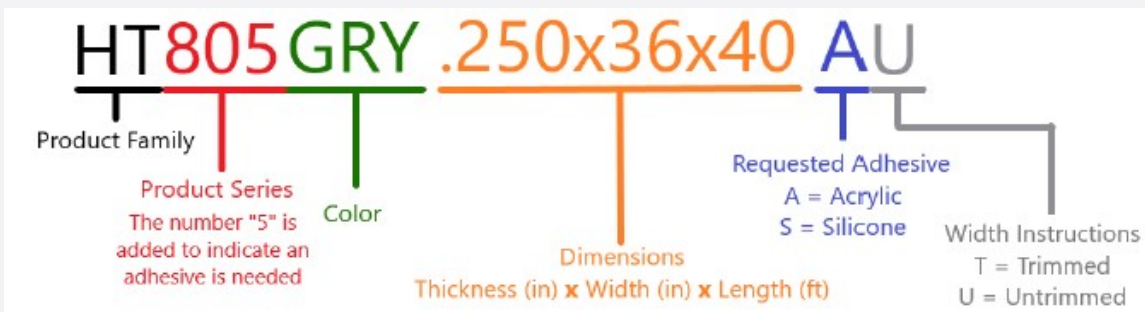

BISCO® Cellular Foam No Adhesive Example:

**** Cellular Foams include: BF1000, BF2000, HT800, HT820, HT840, and HT870 products**

BISCO® Cellular Foam Adhesive Example:

**** If an acrylic adhesive is needed on both sides a 2 would be placed in front of the A, reading 2AU**

BISCO® Calendar Solid Adhesive Example:

**** Calendar Solids include: HT1200 series, HT6000 series, and MS1600 series products**

**** No Adhesive Calendar Solids follow the same nomenclature structure as the Cellular Foams**

**** The 40 in 1240 depicts the durometer, which is why we do not change it for solid products.**
