

BISCO® RS-840 Very Firm

BISCO® RS-840 Very Firm silicone sponge is a new alternative to BISCO® HT-840.

BISCO RS-840 Very Firm silicone sponge retains the lightness of a foam while exhibiting the enhanced sealing capabilities of a traditional sponge rubber.

While BISCO RS-840 Very Firm is a cellular silicone alternative to BISCO HT-840, there are some differences between the products. Use the comparison table below to determine whether BISCO RS-840 Very Firm is a suitable alternative for your application.
