

## Rogers Corporation Reports Second Quarter 2023 Results

### *Operating Performance Drives Continued Margin and Earnings Improvement*

Chandler, Arizona, August 3, 2023: Rogers Corporation (NYSE:ROG) today announced financial results for the second quarter of 2023.

“We continued to execute on our profitability improvement plans in the second quarter which drove gross margin and earnings per share results that exceeded the mid-point of our guidance,” stated Colin Gouveia, Rogers' President and CEO. “We are pleased with the progress we have made thus far, and we remain intently focused on driving additional margin and earnings improvement in the coming quarters. Challenging market conditions tempered sales for the second quarter, but with our strong technology portfolio we remain extremely well positioned to benefit as demand improves. We continue to execute on our strategy to achieve our long-term growth targets, including the recent announcement that we are expanding our power substrate capacity to capitalize on the accelerating demand for silicon carbide devices in EV and renewable energy markets.”

## **Q2 2023 Summary of Results**

Net sales of \$230.8 million decreased 5.3% versus the prior quarter resulting from lower sales in both the AES and EMS business units. AES net sales decreased by 4.2% primarily related to lower EV/HEV and ADAS sales, partially offset by higher aerospace and defense (A&D) and industrial revenues. EMS net sales decreased by 6.7% primarily from lower general industrial and consumer revenues, partially offset by higher portable electronics and A&D market sales. Currency exchange rates favorably impacted total company net sales in the second quarter of 2023 by \$0.7 million compared to prior quarter net sales.

Gross margin improved to 34.5% compared to 32.7% in the prior quarter due to improved factory productivity, lower material costs, a decrease in logistics costs and favorable product mix, partially offset by lower sales volume.

Selling, general and administrative (SG&A) expenses decreased by \$14.0 million from the prior quarter to \$46.1 million. The lower SG&A expense was due primarily to a decrease in professional service fees and variable compensation costs.

GAAP operating margin of 12.1% increased from (0.1)% in the prior quarter. The higher operating margin was due to the improvement in gross margin, lower SG&A, lower restructuring and impairment charges and an increase in other operating income. Adjusted operating margin of 13.4% increased by 300 basis points versus the prior quarter.

GAAP earnings per diluted share were \$0.96 compared to earnings per diluted share of \$(0.19) in the previous quarter. The increase in GAAP earnings per diluted share was due to higher operating income, partially offset by an increase in tax expense. On an adjusted basis, earnings were \$1.07 per diluted share compared to adjusted earnings of \$0.87 per diluted share in the prior quarter.

Ending cash and cash equivalents were \$141.5 million, a decrease of \$52.3 million versus the prior quarter. Net cash provided by operating activities in the second quarter was \$15.7 million, capital expenditures were \$11.5 million and a principal payment of \$60 million was made on the outstanding borrowings under the Company's revolving credit facility.

## **Financial Outlook**

	<b>Q3 2023</b>
Net Sales (\$M)	\$230 to \$240
Gross Margin	34.0% to 35.0%
Earnings Per Diluted Share	\$1.20 to \$1.40

## ***Reconciliation of non-GAAP financial measures to the comparable GAAP measures***

### ***Non-GAAP financial measures:***

This earnings release includes the following financial measures that are not presented in accordance with generally accepted accounting principles in the United States of America ("GAAP"):

(1) Adjusted operating margin, which the Company defines as operating margin excluding acquisition-related amortization of intangible assets and discrete items, which are acquisition and related integration costs, dispositions, gains or losses on the sale or disposal of property, plant and equipment, restructuring, severance, impairment and other related costs, non-routine shareholder advisory costs, (income) costs associated with terminated merger, UTIS fire and recovery charges and the related income tax effect on these items (collectively, "discrete items");

(2) Adjusted net income, which the Company defines as net income (loss) excluding amortization of acquisition intangible assets, pension settlement charges and discrete items;

(3) Adjusted earnings per diluted share, which the Company defines as earnings per diluted share excluding amortization of acquisition intangible assets, pension settlement charges and discrete items, divided by adjusted weighted average shares outstanding - diluted;

(4) Adjusted EBITDA, which the Company defines as net income (loss) excluding interest expense, net, income tax expense (benefit), depreciation and amortization, stock-based compensation expense, pension settlement charges and discrete items;

(5) Adjusted EBITDA Margin, which the Company defines as the percentage that results from dividing Adjusted EBITDA by total net sales;

(6) Free cash flow, which the Company defines as net cash provided (used) by operating activities less non-acquisition capital expenditures.

Management believes adjusted operating margin, adjusted net income, adjusted earnings per diluted share, adjusted EBITDA and adjusted EBITDA margin are useful to investors because they allow for comparison to the Company's performance in prior periods without the effect of items that, by their nature, tend to obscure the Company's core operating results due to potential variability across periods based on the timing, frequency and magnitude of such items. As a result, management believes that these measures enhance the ability of investors to analyze trends in the Company's business and evaluate the Company's performance relative to peer companies. Management also believes free cash flow is useful to investors as an additional way of viewing the Company's liquidity and provides a more complete understanding of factors and trends affecting the Company's cash flows. However, non-GAAP financial measures have limitations as analytical tools and should not be considered in isolation from, or as alternatives to, financial measures prepared in accordance with GAAP. In addition, these non-GAAP financial measures may differ from, and should not be compared to, similarly named measures used by other companies. Reconciliations of the differences between these non-GAAP financial measures and their most directly comparable financial measures calculated in accordance with GAAP are set forth below.
